

LTA Symbols

2D Architectural Symbols for AutoCAD & AutoCAD LT

LTA Symbols has hundreds of design components for AutoCAD and AutoCAD LT users, including Furniture, Electrical and Kitchen fittings, Landscape, Plumbing, Heating and Signage, to help you add further detail to your design.

The majority of the symbols in LTA Symbols are not just blocks that have to be stretched and scaled to the correct size, but are intelligent parametric symbols. This means that you can define the key dimensions and the symbol is automatically and instantly drawn to the size you require. As many of the symbols in LTA Symbols are available in elevation as well as plan, they can be used to quickly add detail to your internal or external elevations.

One of the pages from the furniture dialog is shown above. Over leaf are some examples of pages from the other symbol categories.

Electrical Fixtures
